**Northwest Tribal Cancer
Resource Guide**

**A guide to Cancer Resources and Plans for
Northwest Tribal Communities**

January 2007

In Memory of Violet Sore Arm Allman

(September 5, 1922 – July 23, 2002)

This Northwest Tribal Cancer Resource Guide is offered in memory of Violet Sore Arm Allman (Nez Perce) whose baskets are featured in this guide. She was a kind and generous person whose memory will live on forever in the lives of all who knew her. Ms. Allman was one of the founders of Pi Nee Waus, an organization serving American Indian elders in the Portland-Vancouver metropolitan area. Violet and her husband, the late Blu Allman, were actively involved in the 1960's structuring of the Portland Indian Community. She taught her culture, stories, and language to the Native community.

Baskets and cornhusk bags courtesy of the Violet Allman Collection (Nez Perce)

Acknowledgements

The staff of the Northwest Tribal Cancer Control Project (NTCCP) offers their appreciation to all the organizations in this guide. Our hope is that this cancer control guide will make resources more easily accessible in tribal communities throughout the Northwest. Staff developed the Northwest Tribal Cancer Resource Guide based on information supplied by each organization.

We offer our heartfelt gratitude to Sande Allman (Oglala Lakota/Nez Perce) for offering the use of the photographs of Nez Perce baskets and cornhusk root bags from the late Violet Allman collection. Our compliments go out to Kristen Potts (Pit River/Maidu) who photographed these items.

Staff of the Northwest Tribal Comprehensive Cancer Project also acknowledges the Native CIRCLE for working with us to print this information. Their assistance has made it possible for printed copies of this resource to be available to you. The Centers for Disease Control and Prevention has been invaluable for their ongoing support as well as every organization that has provided services and other resources to the Northwest Tribal Cancer Control Project and northwest tribes served. The South Puget Intertribal Planning Agency is thanked for their contribution of a county level resource guide for tribal cancer control. We seek to continue to work collaboratively as we strive to reduce the cancer burden in our communities.

Another word of thanks goes to Peggy Biery (Grand Ronde), former NTCCP specialist, and Ruth Jensen (Tlingit), former NTCCP director, for their initial work on many of the items included here. Cicelly Gabriel (Lakota/Yurok) and Eric Vinson (Cherokee) have taken the initiative to bring together all the information needed to complete this document for your use and have made ongoing contributions in content and design.

We are also grateful for Barbara Watson (Siletz) for her critique and recommendations for the layout design.

* * *

This Northwest Tribal Cancer Resource Guide was supported by Cooperative Agreement No. U55. CCU021985-04 of the Centers for Disease Control and Prevention. The contents of the guide are solely the responsibility of the Northwest Tribal Comprehensive Cancer Program and do not necessarily represent the official views of CDC.

Preface

The purpose of this cancer control guide is to provide information about cancer control resources available to tribal communities throughout Idaho, Oregon, and Washington. This is not an exhaustive list.

In an effort to link tribes to available resources that they may have not used in the past, we have provided the following information: general information about the agency's goals and objectives, a brief description of what resources are available, and a description of how and where to obtain them.

NTCCP staff have called the numbers and have verified the information included in this guide with the exception of some items gleaned from websites and other sources. We request that all contributors update their information as needed. If you would like to provide any other updates, please use the form provided at the back of this guide. All information is current as of January 2007.

Section 1: Northwest Portland Area Indian Health Board – An Overview

Basket courtesy of the Violet Allman Collection (Nez Perce)

Introduction

The purpose of this booklet is to provide information needed to obtain cancer prevention and control resources in your tribal community. **Section 1** includes general information about the Northwest Portland Area Indian Health Board (NPAIHB). This includes a map of the Portland Area, which encompasses Idaho, Oregon, and Washington. **Section 2** provides information for cancer contacts within NPAIHB member tribes. **Section 3** provides information about organizations, which offer resources for cancer patients and caregivers. **Section 4** describes breast and cervical cancer screening programs in the Portland Area. **Section 5** describes tribal cancer control planning with forms and examples of strategic and activity plans. **Section 6** provides information about organizations, which offer resources for program development of tribal cancer prevention and control. These organizations include Tribal, State, Federal, and Foundation. **Section 7** contains listings for all Approved Cancer Programs by the American College of Surgeons in the Portland Area. **Section 8** appends information that can enhance cancer control efforts in tribal communities. Each section provides (a) general information about the organization, (b) what resources are available, (c) how to obtain the resources, and (d) where they are available.

Cancer is the second leading cause of death among American Indians and Alaska Natives nationally.¹ Cancer consists of more than one hundred diseases. Nearly two-thirds of all cancers could be prevented through healthy lifestyle choices. The American Cancer Society reports, that one third of the more than 500,000 cancer deaths that occur in the United States each year can be attributed to diet and physical activity habits, with another third due to cigarette smoking.² The efforts represented throughout this guide have one goal in common, and that is to reduce the cancer burden, which is measured by the number of cases, the number of deaths, the effects of the disease, and the length of time people are able to survive a cancer diagnosis.

As a comprehensive cancer control program, the Northwest Tribal Comprehensive Cancer Program is working to take an integrated and coordinated approach to cancer control through prevention, screening and early detection, diagnosis, treatment, rehabilitation, and palliation (or comfort care). Through our individual efforts, we each can contribute significantly to a healthier community.

Northwest Portland Area Indian Health Board

Northwest Tribal Comprehensive Cancer Program

The mission of the Northwest Portland Area Indian Health Board is to assist Portland Area tribes to improve their health status and quality of life of member tribes and Indian people in their delivery of culturally appropriate and holistic health care.

The goal of the Northwest Tribal Comprehensive Cancer Program is, in consultation with tribes, to save lives by eliminating all preventable forms of cancer in Northwest tribal communities throughout Idaho, Oregon, and Washington.

Yakama Office of Native Cancer Survivorship

Mission: Improve the lives of those faced with a cancer diagnosis through the initiation of and access to cancer services and support that will result in improved survivorship and quality of life thereafter.

Vision: Advance delivery and quality of cancer care and survivor support for Alaska Natives and American Indians is our priority and motivation.

Our Philosophy: Collaborate with Native communities and Native Health Organizations to complement, enhance and extend existing cancer related care and support services.

Who we are: We are survivors, tribal members and health care professionals living in communities we serve. Committed to investing in our people, tribes and communities. Influencing progression in the landscape of cancer care and support. We are a Native operated and governed non-profit 501(c)(3) organization serving the native population.

What We Do: The ONCS programs work to collectively support our mission through four focused avenues:

- **Support**
- **Education**
- **Advocacy**
- **Policy**

Native People's Circle of Hope

General Information Native People's Circle of Hope (NPCOH) serves Native American cancer survivors, their families, caretakers and medical providers who live on and off their reservations. NPCOH is a coalition of Native American cancer survivor support groups whose mission is to provide hope, communication, support, education, advocacy for the cancer survivor. Members of the coalition are from Alaska, Oregon, Idaho, Montana, Arizona and Oklahoma.

Resources Available The "Medicine-Bag" project wherein NPCOH gifts to newly diagnosed cancer survivors, regardless of the type of cancer or ethnic background items that a cancer survivor might need during their treatment. The items gifted are a pill container, water bottle, hat, lap quilt, cancer books, slippers, beaded "Medicine-Bag" necklace, and other similar donated items. This project enlists the help of many volunteers to collect the products, make the quilts and bead the necklaces. The volunteers are encouraged during the course of the activity to adopt healthy behaviors that can lower their risk for a cancer diagnosis.

The hosting of the annual "Roots of Strength" national conference for native cancer survivors, participation in state planning efforts wherein they affect Native cancer issues, and starting cancer support groups in Native communities. NPCOH collaborates with the Native American Cancer Researchers, Cancer Information Service, NCI-Director's Consumer's Liaison Group, Ovarian Cancer Coalition, National Patient Advocate Foundation, Lance Armstrong Foundation, Susan G. Komen Foundation, Huntsman Cancer Institute and many others.

Northwest Tribal Cancer Navigator Program

General Information

The Northwest Tribal Cancer Navigator Program is a community-based intervention sponsored by the National Cancer Institute addressing barriers to timely, quality cancer diagnosis and care for American Indians.

Resources Available

Navigators are nurses or community members with training and experience in cancer issues. They are available to help any Native patient and their family who have abnormal cancer screenings, who need diagnostic tests related to cancer, or who have diagnosed cancer. Navigators cannot provide direct services, however can help coordinate medical care and non-medical issues, such as transportation services, paperwork, and insurance. Participating sites include the Grand Ronde Health & Wellness Center in Grand Ronde, Oregon; the Puyallup Tribal Health Authority in Tacoma, Washington; the Siletz Community Health Clinic in Siletz, Oregon; the Shoshone-Bannock Tribal Health Center in Fort Hall, Idaho; and the Yakama Indian Health Center in Toppenish, Washington. The project is expected to run until October 2010.

How to Obtain Resources

Navigators are available to patients at the participating clinics who have cancer or who have screening tests or symptoms that mean they could have cancer. For more information regarding navigation services, please contact NPAIHB or visit one of the tribal programs listed in the Appendix A.

Cancer Care Resources

General Information Cancer Care Resources is a community based service that offers support to anyone in the Portland/Vancouver area who is dealing with cancer. Our staff, composed of oncology trained nurses, social workers and therapists, conducts personal assessments of anyone with a cancer diagnosis in order to help identify problems and help construct a plan to improve their quality of life during this challenging journey.

Many people diagnosed with cancer are focused on medical treatments but are not able to manage the emotional, nutritional or physical impacts brought on by their condition. They may need assistance coping with treatment side effects or access to resources that address financial, social or workplace issues. Some may require guidance with advanced directives. Regardless of their condition or their concern, we welcome the opportunity to work with them.

Resources Available Our Staff, composed of oncology trained nurses, social workers and therapists, conducts personal assessments of anyone with a cancer diagnosis in order to help identify problems and help construct a plan to improve their quality of life during this challenging journey

Our Services Focus On:

1. Patient Assessment
2. Information and Referral
3. Counseling and Education
4. Support
5. Exercise
6. Nutritional Counseling

How to Obtain Resources Please contact us for assistance

CancerLifeline

General Information Cancer Lifeline was founded in 1973 by a cancer patient who could not find the community resources and support she needed to help her “live with it.”

From the start, the mission of Cancer Lifeline has been to optimize the quality of life for all people living with cancer. We became a United Way agency in 1975. Gifts and grants provide most of our support, enabling Cancer Lifeline to serve more than 9,000 people a year.

Our programs are based on the vital needs of people living with cancer. We offer you choices and encourage you to take control. We provide information so that you can make better choices. We stress inclusion rather than isolation. And most of all, we provide the environment where you have the freedom to express feelings without being judged.

- Resources Available**
- 24-hour telephone “Lifeline” provides emotional support, information and community resource referral. **1-800-255-5505**
 - Education and support groups help people live with cancer including Lymphedema education and support
 - The Family Support Program provides cancer patient’s family and friends ways to strengthen relationships and open lines of communication.
 - Healing Arts for Creative Expression Program offers a wide variety of workshops in creative arts, writing, movements.

The Healing Promotion focuses on exercise, movement and nutrition. All services are **FREE of charge** to Cancer patients, family, and friends.

How to Obtain Resources Please contact us for assistance

Cancer Patient Care

General Information Created by volunteers in 1958, Cancer Patient Care is still the only resource in our community and region comprehensively focused on meeting the needs of low and moderate-income cancer patients and their families. The life-threatening disease of cancer depletes clients and their families physically, financially, and emotionally. *At Cancer Patient Care they find comfort, hope and access to the services and support they desperately need.*

Resources Available A variety of essential services are provided to cancer patients and their families who meet our income guidelines. The services below are provided once income and diagnosis have been verified and clients have met with one of our social service professionals. Healthcare and social service providers may contact us in lieu of a direct visit should distance be an issue. Note that no cash is provided directly. We have established accounts with partnering businesses and arrangements are made for delivery of services.

Emergency Financial Assistance – including:

- Groceries
- Prescriptions
- Utility bills
- Transportation to cancer treatments or doctor visits
- Emotional support
- Nutritional supplements including liquids and puddings
- Cancer-related educational materials
- Survivorship information

No income guidelines apply to the resources below:

- Medical Equipment
- Wheelchairs
- Walkers
- Commodes
- Shower equipment
- Hospital beds
- Durable medical products such as incontinence supplies, etc.
- Wigs, hats and scarves
- Breast prostheses and surgical bras

How to Obtain Resources Those seeking assistance should consult their oncology nurse or social service advisor to verify qualification. Current guidelines for service and applications are available online or may be requested directly from Cancer Patient Care. Our region of service includes the the nine Eastern Washington counties as well as the entire Colville Confederated Tribes reservation lands for tribal members. Service is provided for patients residing in the five North Idaho counties who are being treated in Washington.

Cancer Patient Care receives no fees for service. All assistance and support is provided free to qualifying clients and their families.

Contact Information For more information contact us at: (509) 456-0446 or visit www.cancerpatientcare.org

Gilda's Club Seattle

General Information

Gilda's Club Seattle is a non-profit organization that provides a community of support for anyone touched by cancer—men, women and children with all types of cancer, and their families partners, and friends. We're here to offer people living with cancer a place to get and give understanding, support, and maybe even a few laughs. Community is key at Gilda's Club, where we offer people a chance to face cancer together instead of alone. All of our activities take place in our non-residential, home-like setting.

Gilda's Club is named after a great comedian, Gilda Radner, who found value in the support she received when she had cancer.

Resources Available

At Gilda's Club, you'll find support groups, workshops and lectures, social gatherings, art and exercise classes, the Noogieland kids program, teen programs, and much more.

All of our activities are free of charge.

How to Obtain Resources

To take part in the community of Gilda's Club Seattle, become a member. It's easy, and free of charge. Please call Gilda's Club to schedule a New Member Orientation and complete a Customized Membership Plan. We'll give you a tour of Gilda's Club and an orientation to our community, plus meet with you individually to help you structure your own plan for support.

PATIENT ADVOCATE FOUNDATION

Providing Professional Services Nationally since 1996

General Information Patient Advocate Foundation is a national non-profit organization that seeks to safeguard patients through effective mediation assuring access to care, maintenance of employment and preservation of their financial stability.

Resources Available Patient Advocate Foundation seeks to empower patients to take control of their health care. Case managers work with patients to discover local, state, and federal programs that provide assistance for their individual needs. PAF has produced six major publications, several informational brochures, and several special sections devoted to certain health related topics to assist in this goal. Our case managers have also compiled a list of valuable resources that address several topics that you may find beneficial.

How to Obtain Resources If you or someone you know needs assistance with their insurer, employer and/or creditor regarding insurance, job retention and/or debt crisis matters relative to their diagnosis of life threatening or debilitating diseases, please call us at 1-800-532-5274 or email us.

We are constantly adding resources for patients and professionals. If you are unable to find a particular resource or wish to add a resource, please email us.

General Information

CancerCare is a national non-profit organization that provides free, professional support services to anyone affected by cancer: people with cancer, caregivers, children, loved ones, and the bereaved. CancerCare programs – including counseling, education, financial assistance and practical help – are provided by trained oncology social workers and are completely free of charge. Founded in 1944, CancerCare now provides individual help to more than 90,000 people each year, in addition to the 1.4 million people who gain information and resources from its website.

Resources Available

CancerCare Connect™: Expert-led educational programs on a variety of cancer-related topics

CancerCare Counseling™: Professional counseling and facilitated support groups

CancerCare Inform™: Resources and strategies for finding help

Angel Flight West

General Information

The year was 1983. At that time the Los Angeles chapter of the American Medical Support Flight Team was launched with a lot more good intentions than flights. In fact, for the first several years of its existence, what would later be called Angel Flight West had an uphill battle to convince people that it was giving away free air transportation!

Angel Flight, a volunteer organization dedicated to providing free air transportation to medical treatment for patients and their families who cannot afford public transportation or who cannot tolerate it for health reasons.

The Oregon, Washington, and Idaho Angel Flight Wings currently (2007) have approximately 500 members. Of these, well over 300 are mission pilots annually flying hundreds of missions across the NW and beyond.

We also fly missions for other compelling needs such as transporting young cancer victims to Camp Rainbow Gold each summer in Sun Valley. The Idaho Wing meets the growing need of Idaho families by providing continued education to community organizations about available services and by recruiting pilots to fly missions.

Resources Available

The organization will fly patients and their families to medical care on a non-emergency basis who demonstrate medical and financial need.

How to Obtain Resources

If you are a medical or social work professional who is interested in learning about free transportation for your patients in need, please contact our Outreach Coordinators. They can supply information and can arrange for an Angel Flight representative to make a presentation to your group. This largely consists of one-on-one meetings and presentations with hospitals, non-profit organizations, and government agencies.

Contact Information

If you are interested Angel Flight doing a site visit to your tribe or tribal health program, contact Angel Flight West and they will put you in contact with your local Angel Flight Outreach Coordinator. They can also be found on the Angel Flight web site by state.

Joe's House

General Information

Joe's House is a non-profit organization that serves both clinic staff and cancer patients. Founded in 2003, Joe's House was conceived after Ann Calahan's first husband, Joe Warnecke, died of cancer. Joe battled the disease for six years. During those six years, Ann and Joe had difficulty finding appropriate accommodations in unfamiliar cities. Ann vowed to correct this problem. After Joe's death Ann conceived the idea of a non-profit organization that would specialize in accommodations for traveling cancer patients.

Fighting cancer takes energy and determination. The focus of patients, friends and families should be on beating this disease and not worrying about a place to stay. Our goal is to help ease that burden.

Resources Available

Joe's House is an online housing guide for cancer patients, families and caregivers. The website, at www.joeshouse.org lists over 900 lodging options in over 50 cities across 34 states. This is a directory of housing near hospitals and cancer centers.

Details available include:

- Distance to hospitals
- Lodging type (Hotel, Motel, House, etc)
- Amenities
- Cost
- Reservation contact information

How to Obtain Resources

Access the housing guide via the website at www.joeshouse.org or toll free line (877) JOES HOU or (877) 563-7468.

Contact Information

Lance Armstrong Foundation

Survivorship Resources

General Information

The Lance Armstrong Foundation (LAF) inspires and empowers people affected by cancer. We help people with cancer focus on living; we believe that unity is strength, knowledge is power and attitude is everything. From the moment of diagnosis, the LAF provides the practical information and tools people with cancer need to live life on their own terms. The LAF serves its mission through advocacy, public health and research. Founded in 1997 by cancer survivor and champion cyclist Lance Armstrong, the LAF is located in Austin, Texas.

Resources Available

LIVESTRONG SurvivorCare offers counseling services, help with financial, employment or insurance issues and information about treatment options and new treatments in development. **LIVESTRONG SurvivorCare** is a program of the LAF, in partnership with **CancerCare**, Patient Advocate Foundation and **EmergingMed**. To speak to a case manager, call **LIVESTRONG SurvivorCare** toll-free at (866) 235-7205 or visit www.livestrong.org/survivorcare.

The **LIVESTRONG Resource for Cancer Survivors** helps people understand the physical, emotional and practical issues that may accompany a cancer diagnosis. The Resource helps survivors face the challenges of cancer head-on with information about survivorship issues, worksheets to keep organized and stories shared by cancer survivors in their own words. The Resource is available online and as the **LIVESTRONG Survivorship Notebook**, a portable three-ring binder. To access the **LIVESTRONG Resource** or to order a **FREE Survivorship Notebook**, visit www.livestrong.org/cancersupport.

General Information

Our Mission is to cure leukemia, lymphoma, Hodgkin's disease and myeloma, and to improve the quality of life of patients and their families. The Society has chapters nationwide and in Canada.

The Society is the world's largest voluntary health organization dedicated to funding blood cancer research and providing education and patient services.

A diagnosis of leukemia, lymphoma or myeloma brings many daily challenges. The Society is committed to providing support and guidance to patients, families and the healthcare professionals who care for them.

Resources Available

The resources provided by the Society include:

- Patient Education Programs
- Family Support Groups
- Website
- Information Resource Center
- Patient Financial Aid
- First Connection: Peer Support
- Trish Greene Back to School Program

How to Obtain Resources

- Visit the website www.lls.org

Call your chapter's Patient Services Manager:

Oregon: 503-245-9866

WA/AK: 888-345-4572

ID: 208-658-6662

For other chapters go to www.lls.org and consult the map.

National Marrow Donor Program®

Creating Connections. Saving Lives.™

General Information

The National Marrow Donor Program (NMDP) works through active communities, corporate outreach, and partnerships to raise awareness of the need for adult volunteer donors and donations of cord blood units from the American Indian and Alaska Native communities. Nearly 75,000 American Indians and Alaska Natives have joined the NMDP Registry to volunteer as potential marrow or blood cell donors. Nevertheless, more American Indian and Alaska Native donors are still needed, so that more patients can have a chance of finding a match. To learn more, visit marrow.org/join.

Resources Available

The National Marrow Donor Program Office of Patient Advocacy is here to help. On this website, www.marrow.org, you can find information to help you:

- Talk with your doctor
- Choose a transplant center
- Answer questions about caregiving
- Manage financial or insurance matters
- Prepare for life after transplant

All National Marrow Donor Program patient advocacy services and resources are free.

How to Obtain Resources

If you would like more information and/or assistance with the services listed above:

Call toll free in the United States:
(800) MARROW2 (1-800-627-7692)

Outside of the United States call:
(612) 627-8140

Interpreters are available.

American Cancer Society

- General Information** The American Cancer Society is a nationwide community-based, voluntary health organization dedicated to eliminating cancer as a major health problem by preventing cancer, saving lives, and diminishing suffering from cancer through research, education, advocacy, and service.
- Resources Available** Through research, fundraising, and trained volunteers, the American Cancer Society provides a wide array of services including the following: support groups, services, and events for support, information, and ideas about how you can help fight cancer.
- How to Obtain Resources** Please see contact information listed below. For detailed local information please see Appendix A.
- Contact Information** 1-800-ACS-2345 (1-800-227-2345). Visit the website at www.cancer.org. See the contact information in Appendix A for your respective branch of the American Cancer Society.

Cancer Information Service of the Northwest Region

General Information

The National Cancer Institute (NCI), the Nation's lead agency for cancer research, established the Cancer Information Service (CIS) in 1975 to educate people about cancer prevention, risk factors, early detection, symptoms, diagnosis, treatment, and research. The CIS is a leader in providing the latest, most accurate information on cancer in language that is easy to understand. The CIS is an essential part of NCI's cancer prevention and control efforts.

Resources Available

To provide information about cancer to patients and their families, physicians and other health professionals, and the public, the CIS has a three-pronged approach:

- Information specialists answer questions about cancer by telephone, TTY, and instant messaging. They can provide printed and electronic NCI publications.
- The Partnership Program reaches those who may have limited access to health information.
- The Research Program helps researchers advance health communication practices.

How to Obtain Resources

To speak with a CIS information specialist:

- Call CIS toll-free at 1-800-4-CANCER (1-800-422-6237), 9:00 AM – 4:30 PM local time, Monday through Friday.
- People in the U.S. with TTY equipment may call toll-free at 1-800-332-8615, 9:00 AM – 4:30 PM local time, Monday through Friday.

To speak with a smoking counselor:

- Call NCI's Smoking Quitline at 1-877-448-QUIT (1-877-448-7848), 9:00 AM - 4:30 PM local time, Monday through Friday.

Over the Internet:

- If you have Internet access, you get live, online assistance through the *LiveHelp* instant messaging service. Information specialists can answer your questions about cancer, offer help with quitting smoking, and help you use NCI's Web site. Access *LiveHelp* on NCI's Web site www.cancer.gov, (click on "Need Help?" and "Connect to LiveHelp"). This service is available from 9:00 AM to 11:00 PM Eastern time, Monday through Friday.

Section 4: Breast & Cervical Cancer Early Detection Programs

Basket courtesy of the Violet Allman Collection (Nez Perce)

National Breast and Cervical Cancer Early Detection Programs

General Information

The National Breast and Cervical Cancer Early Detection Program (NBCCEDP) builds the infrastructure for breast and cervical cancer early detection by supporting public and provider education, quality assurance, surveillance, and evaluation activities critical to achieving maximum utilization of the screening, diagnostic and case management services. The Centers for Disease Control and Prevention fund programs administrated by State Departments of Health in addition to programs for American Indian and Alaska Natives. In addition to the state programs there are programs administrated by the Native American Rehabilitation Association and South Puget Intertribal Planning Agency.

Resources Available

Get a free or low-cost mammogram and pap test for those who qualify.

How to Obtain Resources

See the following pages (35-45) for program contacts in Idaho, Oregon, and Washington.

Contact Information

The following pages contain information for each of the programs.

Source: www.cdc.gov/cancer/nbccedp/

Native American Rehabilitation Association of the NW, Inc. (NARA)

General Information	The NARA Breast and Cervical Cancer Program provides AI/AN women the opportunity to receive screening, referral and follow-up care in a culturally comfortable environment.
Resources Available	The program offers annual women's wellness exams and breast and cervical health education. Our care includes follow-up, referral, transportation services, and a female health provider. These screening services are provided at low or no cost, to those who qualify; underserved, underinsured, at-risk, never screened or very rarely screened.
How to Obtain Resources	Call or write program staff as noted below.
Contact Information	Women's Wellness Program 15 North Morris Portland, OR 97214 Tel: (503) 230-1989 Fax: (503) 230-9877 Website: www.naranorthwest.org

South Puget Intertribal Planning Agency (SPIPA)

General Information SPIPA is a consortium of five tribes in western Washington, including the Chehalis, Nisqually, Shoalwater Bay, Skokomish, and Squaxin Island Tribes.

Resources Available SPIPA's Native Women's Wellness Program works to reduce breast and cervical cancer mortality through culturally appropriate outreach, education, screening, and diagnostic services. The program provides no-cost mammograms, clinical breast examinations, pelvic exams, and Pap tests to low-income Native American women of the five members tribes, and educational activities.

How to Obtain Resources Call or write program staff as noted below.

Idaho Women's Health Check

General Information

Women's Health Check is a federally funded program that offers free breast and cervical cancer screening to women who qualify. Women's Health Check exams are available statewide from qualified Idaho providers including district health departments, clinics, tribal health facilities, gynecologists, and family practice doctors. Women's Health Check is for:

Resources Available

- **Women between the ages of 50 - 64** for Pap test, clinical breast exam and mammogram
- **Women between the ages of 40 - 49** for Pap test
- Note: Women who have not had a Pap test or not had a Pap test in the last 5 years are at high risk for cervical cancer and are a priority for enrollment.
- Have income below 200% of the federal poverty level (see website)
- No health insurance coverage for Pap tests or mammograms
- Women over age 65 who are NOT eligible for Medicare or cannot afford Medicare Part B

***Limited enrollment and services** available for uninsured women who meet these additional criteria:*

- *Age 30 – 49 and have symptoms suspicious of breast cancer confirmed by a health care professional*
- *Age 30 – 39 and have symptoms suspicious of cervical cancer confirmed by a health care professional*

How to Obtain Resources

Dial 2-1-1 Idaho CareLine or 1-800-926-2588 to refer a client to a *Health Check* Coordinator.

Contact Women's Health Check Central Office 208-334-5805 for questions, material requests, or to find out about partnership opportunities including how to become a Women's Health Check provider.

Oregon Breast and Cervical Cancer Program

General Information

From **bcc 800.doc** on www.oregon.gov/DHS/ph/bcc/

The Oregon Breast and Cervical Cancer Program is currently in the process of reorganizing. During this time, most county BCC Programs will not be enrolling women for routine screening or annual well woman checks. Only women who are experiencing breast and/or cervical cancer symptoms are being screened at this time.

Please call 1-800-4CANCER (1-800-422-6237)

- to setup you routine mammogram and annual women's health exam, call in Spet. 2006
- if you have any breast and/or cervical cancer symptoms (you will be referred to a health care provider in your area)
- if you need any futher information

If you have other breast and/or cervical symptoms that are worrisome to you, information on low-cost or sliding scale health care clinicis in you area can be obtained by calling 1-800-SAFENET (1-800-723-3638) statewide of just by dialing "211" in the Portland metro area

Washington Breast & Cervical Health Program

General Information

The Washington Breast and Cervical Health Program (WBCHP) in Washington state is designed to provide uninsured and underinsured women aged 40 to 64 with breast and cervical cancer screenings. Women ages 40 to 64 whose household income is at or below 250% of the Federal Poverty Level (FPL) Guidelines are eligible for free breast and cervical cancer screening and diagnostic services. Age- and income-eligible women having insurance that covers the procedures either in part, or having not met their deductibles may get their screening and diagnostic services through this program.

Medicaid and Medicare Part B covers the same screening and diagnostic services as WBCHP. Women with Medicaid as their primary health coverage are not eligible for WBCHP. A woman's Medicaid coverage for her dependents has no bearing on her WBCHP eligibility. Women without Medicare Part B may be eligible for the program.

Resources Available

WBCHP pays for annual screenings. This includes a clinical breast examination, mammogram, pelvic exam, and pap test, as indicated.

How to Obtain Resources

To find out about education and screening activities near you, or to learn about becoming involved, contact the local BCC Program near you. You can find out more information either through the local Indian health program or local health department

Section 5: Tribal Cancer Control Planning Forms and Examples

Cornhusk bag courtesy of the Violet Allman Collection (Nez Perce)

Tribal Cancer Action Plans

We have included examples for you to develop tribal action plans related to different phases of cancer control among American Indian and Alaska Native patients and community members. Some of these examples are based on the 20-year plan for Tribal Cancer Control in Northwest Tribes.

We encourage you to use the template to help guide your creativity related to cancer control in your own community. Please pay particular attention to identification of various agencies and other resources that will be useful for implementation of your various programs.

These agencies may include:

- Avon Foundation
- Susan G. Komen Breast Cancer Foundation
- Lance Armstrong Foundation
- American Cancer Society
- Cancer Information Service
- Local Breast and Cervical Cancer Screening and Treatment Program
- Local Cancer Center
- Leukemia and Lymphoma Society
- Native People's Circle of Hope
- Yakama Office of Native Cancer Survivorship
- Spirit of EAGLES

The definitions used for these plans are:

Resources - Individuals or organizations that can partner to accomplish the activities.

Activity - Used to address problem.

Outputs - Result immediately or soon after the activity

Short and Long Term Outcomes - Result of activity in 1 to 6 years following activities.

Impact - Resulting changes from activity in 7 to 10 years.

Sample Cancer Plans

Sample Plans	Resources	Activities	Outputs	Short and Long Term Outcomes	Impact
Cancer Prevention	<ul style="list-style-type: none"> • Tribal Tobacco Coordinator • American Lung Association: Teens Against Tobacco Use (TATU) • American Cancer Society: Tobacco Youth Speakout 	<ul style="list-style-type: none"> • Fun event with meeting 	<ul style="list-style-type: none"> • Number of youth attending group meetings 	<ul style="list-style-type: none"> • Number of youth not using commercial tobacco 	<ul style="list-style-type: none"> • Reduce initiation of commercial tobacco use among youth ages 10-19
Screening and Early Detection	<ul style="list-style-type: none"> • Susan G. Komen Foundation • NTCCP • Region X Women's Health 	<ul style="list-style-type: none"> • Women's health Day, holding educational activities, survivor presentations, food, and fun 	<ul style="list-style-type: none"> • Number of women participate in event 	<ul style="list-style-type: none"> • Number of women who receive annual mammograms 	<ul style="list-style-type: none"> • Increase awareness of women 40 and older about the importance of annual mammograms

Sample Cancer Plans (Continued)

Sample Plans	Resources	Activities	Outputs	Short and Long Term Outcomes	Impact
Cancer Treatment	<ul style="list-style-type: none"> • CancerCare • Patient Advocate Foundation • Yakama Office of Native Cancer Survivorship • Native People's Circle of Hope 	<ul style="list-style-type: none"> • Create Phone tree for volunteer network • Train volunteer network • Distribute phone tree to cancer center for native cancer patients to receive 	<ul style="list-style-type: none"> • Number of volunteer hours • Number of patient assistance 	<ul style="list-style-type: none"> • Number of Patients attending cancer center appointments 	<ul style="list-style-type: none"> • Improve cancer patient attendance at cancer center appointments
Palliation	<ul style="list-style-type: none"> • NPAIHB • Local Cancer Center • Local Spiritual Leadership 	<ul style="list-style-type: none"> • Mobilize local volunteer support network to educate patients about available resources 	<ul style="list-style-type: none"> • Number of community health providers educated 	<ul style="list-style-type: none"> • Number of patients reporting good pain management 	<ul style="list-style-type: none"> • Increase percentage of patients who state that their cancer pain is under good control

Sample Community Activity Plan

Goal: Increase Cancer Awareness									
Activity: Community Cancer Awareness Walk/Ride May 13, 2006									
Action Steps	Accountability		Schedule		Resources		Feedback Mechanism		
	Primary	Others	Start	End	Dollars	Time (hrs)			
Event Planning	Cancer Survivor		4/4/06				Attendance		
Park Facilities Registration	Breast & Cervical Program				\$25	0.3			
Get Event Tables	Cancer Survivor Group		5/13/06	5/13/06	\$0	0.5			
Riding Wagon Rental	Breast & Cervical Program		4/6/06	4/6/06	\$195	0.3	Receipt		
Purchase T-Shirts	Cancer Survivor				\$600	8	Receipt		
Cancer Pins/tape measures	Breast & Cervical Program				\$50	0.6			
Water	Cancer Survivor				\$10	0.2			
Juice	Cancer Survivor	Local Juice Company			\$108	0.6

Northwest Tribal Comprehensive Cancer Program

General Information

In December 1998, the Northwest Tribal Comprehensive Cancer Program (NTCCP) began its work to reduce the cancer burden in Northwest tribal communities by taking an integrated and coordinated approach to cancer control through prevention, screening and early detection, diagnosis, treatment, rehabilitation, and palliation. The Northwest Tribal Cancer Coalition, meeting since 1999, directs project activities.

NTCCP's current priorities are:

1. Meet with tribal cancer control teams to identify potential partners to provide resources to tribes.
2. Contact potential cancer control organizations regarding participation with tribes.
3. Facilitate the development of tribe-specific action plans at initial meetings with tribes and in follow-up conference calls.
4. Conduct meetings between tribal representatives and their current and potential cancer control partners to discuss action plans.
5. Assist tribes in developing evaluation strategies and outcome measures for their action plans.
6. Provide technical assistance to tribes as they implement their action plans.
7. Collect and analyze evaluation data.
8. Prepare final evaluation report.

Resources Available

Staff provide technical assistance and training. Efforts are directed toward bringing more resources into tribal communities to reduce the cancer burden and support tribal cancer control efforts. The 20-year comprehensive cancer control plan and Cancer 101 curriculum are also available for Indian health programs to adapt to their local needs.

Women's Health Promotion Program

General Information

Since its inception in 1995, Women's Health Promotion Program (WHPP) has worked to increase the number of American Indian and Alaska Native women who are screened for breast and cervical cancer. Made up of representatives from Indian health programs in Oregon, the Women's Health Promotion Coalition directs project activities.

WHPP promotes routine women's health checks in a collaborative effort that makes resources available especially for women with inadequate resources for screening. WHPP provides training and technical assistance to the nine federally recognized Oregon Indian tribes as they carry out activities to increase the number of Indian women screened.

Participating tribal health programs are: Burns Paiute Tribe; Confederated Tribes of Coos, Lower Umpqua, Suislaw; Confederated Tribes of Grand Ronde; Confederated Tribes of the Umatilla Indian Reservation; Confederated Tribes of Siletz Indians; Confederated Tribes of the Warm Springs Indian Reservation; Coquille Indian Tribe; Cow Creek Band of Umpqua Indians; the Klamath Tribes; and the Native American Rehabilitation Association.

Resources Available

WHPP provides culturally sensitive curricula and presentations, incorporating traditional values and activities in outreach activities. The Pink Shawl Project, as adapted from the Inter-Tribal Council of Michigan, is one example of this. WHPP provides additional technical assistance in response to the needs of Indian health programs.

Northwest Tribal Epidemiology Center

General Information

The mission of the *EpiCenter* is to collaborate with Northwest American Indian Tribes to provide health-related research, surveillance, and training to improve the quality of life of American Indians and Alaskan Natives.

Until recently, monitoring and surveillance of disease and disease risk factors among AI/AN people has been a function of the Indian Health Service (IHS). In the Portland Area, which includes Idaho, Oregon, and Washington, downsizing diminished the capabilities of IHS to adequately perform basic epidemiologic functions such as monitoring the health status of AI/AN communities. In 1997, the Northwest Portland Area Indian Health Board (NPAIHB) received funding for the development of the Northwest Tribal Epidemiology Center (*The EpiCenter*), with the goal to assist member tribes to improve their health status and quality of life. *The EpiCenter*'s is housed at NPAIHB, a non-profit tribal advisory board established in 1972 to advocate and provide technical assistance for the 43 Federally recognized tribes of Washington, Oregon, and Idaho.

Representatives from health care programs, IHS, and NPAIHB have selected seven Health Status Objectives related to :

- Infant Mortality
- Childhood Immunizations
- Children's Dental Health
- Women's Health
- Tobacco Use Cessation
- Diabetes
- Domestic Violence

For a list of objectives please see: www.npaihb.org/epi

Resources Available

The EpiCenter is involved with collecting data relating to and monitoring progress towards meeting health status objectives; evaluating delivery systems and data systems; and assisting tribes to identify high priority needs for health care delivery and health education.

Northwest Tribal Registry Project

General Information

The Northwest Tribal Registry Project was developed in January 1999 by the Northwest Tribal Epidemiology Center. The Registry Project utilizes a probabilistic linkage methodology to increase the quality of disease surveillance data for American Indians and Alaska Natives in Idaho, Oregon and Washington.

Morbidity and mortality data on Northwest AI/AN exist in many health-related data sets not controlled by Indian health care programs, including state cancer registries, hospital discharge data sets, and state death certificates. Unfortunately, race data are often incorrectly or inconsistently recorded, leading to incomplete and inaccurate race-specific disease measures.

By employing the record linkage methodology, the Registry Project allows for the identification of racial misclassification and thus a more accurate characterization of disease burden among the Northwest AI/AN population.

Resources Available

The project can provide Northwest Tribes and Tribal Health Programs

- Racially corrected Portland Area IHS, state specific, county or zip code based AI/AN cancer incidence and mortality
- Assistance with tribal cancer data needs as requested

Contact Information

For more information, please contact:

Western Tobacco Prevention Project

General Information

The Vision of the NPAIHB Tobacco Team

The Western Tobacco Prevention Project's (WTPP) vision is to enhance the wellness of American Indian and Alaska Native communities by providing culturally appropriate tobacco education and prevention resources through training, technical assistance, collaboration and advocacy with a commitment to excellence.

Tobacco Related Cancers

Tobacco use is the single most preventable cause of cancer. Currently, almost 40 percent of all American Indian and Alaska Native deaths are estimated to be attributable to commercial tobacco. Eight forms of cancer are largely attributed to smoking, including: mouth, larynx, pharynx, lung, esophagus, pancreas, kidney, pelvis and bladder cancer. The use of cigarettes, cigars, pipes, and smokeless tobacco, as well as exposure to second hand smoke, extensively increases one's risk of developing cancer.

NPAIHB Tobacco Project Goals

- Promote respect for the sacred use of traditional tobacco
- Promote cessation services
- Prevent youth initiation
- Reduce exposure to secondhand smoke
- Counter tobacco company advertising on tribal lands

Resources Available

Resources provided by the Western Tobacco Prevention Project

- Technical assistance tailored to reduce commercial tobacco use
- Assistance in the development of media materials and campaign information
- Access to information about tobacco and culturally appropriate materials
- Workshops, training, and skill-building sessions
- Assistance in policy development around clean indoor air and youth access

Project Red Talon

General Information

Project Red Talon (PRT) provides education, training, and technical assistance to the tribes of Idaho, Oregon, and Washington on the prevention and treatment of sexually transmitted diseases.

Resources Available

Project Red Talon provides STD training and technical assistance to tribal medical providers, health professionals, and community health advocates. PRT facilitates the Red Talon STD/HIV Coalition, a group committed to reducing the prevalence of STDs among American Indians and Alaska Natives in the Pacific Northwest. PRT supports the adoption of new STD screening and treatment practices in tribal clinics. And by developing brochures, fact sheets, and resources, PRT supports activities that increase tribal knowledge about effective STD prevention, screening, and treatment strategies.

How to Obtain Resources

Western Tribal Diabetes Project

General Information

The goal of Western Tribal Diabetes Project (WTDP) is to provide technical assistance to Northwest Tribes to develop a system for sustained data collection, reporting, and utilization. The objectives of WTDP are designed to assist the Tribes:

- Build a foundation to provide complete and accurate information about patients with diabetes
- Estimate the burden of disease and impact of diabetes by using an electronic diabetes register
- Improve health outcomes by using an electronic diabetes register to make informed decisions about clinical diabetes care
- Prevent diabetes in high-risk individuals
- Computer Trainings
- Assistance annual audit

Resources Available

WTDP has developed several tools to guide diabetes programs data improvement and health promotion activities.

WTDP has developed several tools to be used throughout the data improvement process. These tools include:

- Capacity Measurement Scale
- Mock Reports
- Site Work-plan
- Diabetes Screening Toolkit
- Bulletin
- RPMS Computer Program Training
- Workshops for Data Utilization
- Summary Diabetes Reports
- Excel Reports for Diabetes Audit

South Puget Intertribal Planning Agency

Comprehensive Cancer Control Project

General Information

South Puget Intertribal Planning Agency, SPIPA, driven by the values of service, collaboration and respect, has been serving the five tribes in Western Washington including: the Shoalwater Bay Tribe, Skokomish Tribe, Squaxin Island Tribe, Confederated Tribes of the Chehalis Reservation, and Nisqually Tribe, since 1976. Each tribe has their own characteristics that reflect their rich history and traditions as well as vision for the future. All five tribes have worked hard to develop community centers, health facilities, youth programs, elder services, tribal enterprises, and more. There is a National Breast and Cervical Cancer Program available for education and screening members of the five SPIPA tribes.

SPIPA's Cancer Control Planning efforts are rooted in the notion that many successful programs in Indian Country have begun as small projects that gradually developed and evolved in response to the needs of the communities being served. Meeting the needs of our five tribes works best with small, local beginnings and strong partnerships that respect community-based planning and management. This means important planning and decision making still take place at the tribal or community level.

SPIPA recognizes that good health can only be attained through helping tribal and community members improve the whole situation in which they live. Through strong partnerships this program is linking health activities with other aspects of social development. Health is seen as a state of wholeness and well being in the five tribes. This program is committed to cancer control efforts that enable tribal and community members from the SPIPA tribes to work together to improve community wellness in a way that is self-reliant and responsive to ongoing needs.

Resources Available

- Provide cancer prevention, education and awareness for tribal and community members at the SPIPA tribes
- Detect all screenable cancers at the earliest stage for tribal and community members
- Ensure that all tribal and community members with cancer at the Tribes receive cancer treatment services
- Ensure that tribal and community cancer survivors and their loved ones at all five tribes receive support

Comprehensive Cancer Alliance for Idaho (CCAI)

General Information

Idaho aims to coordinate efforts to address the cancer burden by strengthening alliances and encouraging collaboration to address the continuum of cancer care. We will identify gaps in service delivery, maximize resources, enable changes in systems and policies, and implement multi-level interventions to reduce cancer incidence and mortality and improve quality of life. The Comprehensive Cancer Alliance for Idaho (CCAI) has identified five focus areas that will be targeted:

- Prevention
- Early Detection
- Treatment
- Quality of Life and Survivorship Issues
- Data

Resources Available

The resources available include:

- Idaho Comprehensive Cancer Control Strategic Plan: Available August 2006
- Idaho Cancer Resources- Local, Regional, and Statewide - Available July 2006 online at www.idcancer.org/ccc (For those without internet access please use the contact information below)
- Idaho Needs Assessment: Results from Seven Idaho Community Forums October/November 2005

Oregon Partnership for Cancer Control (OPCC)

General Information

Oregon Partnership for Cancer Control, OPCC, was formed in April 2004 to create the first statewide cancer plan for Oregon. More than 75 organizations are represented from health care, voluntary and community-based organizations. Membership and meetings are open to any interested individual or organization. OPCC activities are supported by a grant from the Centers for Disease Control and Prevention.

Washington Comprehensive Cancer Control Partnership (WCCCP)

General Information

Washington Comprehensive Cancer Control Partnership, WCCCP, is a diverse group of public, private, and non-profit organizations and individuals working to implement and evaluate the state cancer plan. WCCCP includes over 180 organizations and individuals. Membership and meetings are open to any organization or individual interested in cancer prevention and control. In 2006, the WCCCP received the first annual C-Change Exemplary Planning Award, recognizing a Comprehensive Cancer Control plan developed through a stakeholder and data driven process that is likely to be effective during its implementation phase.

Resources Available

A variety of resources are available on the Department of Health CCC Program website: www.doh.wa.gov/ccc

- Washington State Comprehensive Cancer Control Plan, 2004-2008

Project Filter

Idaho Tobacco Prevention and Control Program

General Information

Project Filter is a federally and state funded program that offers support to Idaho Tribes to address commercial tobacco use and secondhand smoke. Efforts towards prevention, cessation and elimination of secondhand smoke are developed by each Tribe and accomplished through a mix of education about commercial and traditional tobacco use, tobacco marketing awareness, and a strengthening of cultural ideals, leadership skills and community involvement.

Project Filter Goals

- Preventing young people from starting to smoke
- Eliminating exposure to secondhand smoke
- Promoting quitting among young people and adults
- Identifying and eliminating disparities in tobacco use among different population groups

Cessation Resources

Cessation services are offered through some Tribal Health Clinics and most local Health Departments. (See Tribal Tobacco Contacts below). Additional cessation assistance is available through:

Idaho QuitLine 1 (800) QUITNOW

TTY 1- 888 - 229 - 2182

- Free telephone counseling service to help smokers quit
- 5 free cessation Counseling sessions with trained cessation counselor
- Printed education materials
- Information about medications to help smokers quit
- All services are available in English, Spanish and for the Deaf and Hard Hearing Community.

Idaho QuitNet

www.idaho.QuitNet.com

- Free internet service that can help smokers quit
- Offers expert advice on quitting
- Online support from other smokers who are trying to quit
- Quitting guides to help smokers plan their quit attempt
- Directory of classes in local areas
- Quit calendar

Or call 2-1-1, Idaho CareLine

Spirit of EAGLES

National Cancer Institute Community Networks Program

General Information

The goal of Spirit of EAGLES Community Networks Program (SoE CNP), a program of the National Cancer Institute's (NCI) Center to Reduce Cancer Health Disparities, is to reduce cancer disparities in American Indian/Alaska Native populations through community participation in education, research, and training. A major focus of this effort is to improve access to and utilization of beneficial cancer interventions by AI/ANs residing in both rural and urban settings. In addition, SoE CNP strives to provide mentoring and training opportunities for AI/AN researchers who will work to continue to address reduction and elimination of cancer disparities within these settings.

SoE CNP works through partnerships to bring the voice of the community forward to define the most effective ways to reduce the burden of cancer within this population. Examples of these partnerships include tribal organizations like the Northwest Portland Area Indian Health Board, National Indian Health Board, tribal communities, and the NCI's Cancer Information Service Northwest Region among others.

Resources for Cancer Control developed in collaboration with the NPAIHB

Cancer 101 – A Cancer Education and Training Program for American Indians and Alaska Natives. Teresa Guthrie, RN, MN, developed the Cancer 101 curriculum in consultation with Northwest tribes and the Northwest Tribal Cancer Control Project. It includes seven learning modules about cancer: 1) cancer among American Indians and Alaska Natives, 2) what is cancer, 3) cancer screening and early detection, 4) cancer diagnosis and staging, 5) cancer risk and risk reduction, 6) basics of cancer treatment, 7) support for patients and caregivers. The resource also includes evaluation forms, training tips, a glossary, and list of resources.

You can download the curriculum from the NPAIHB website:
www.npaihb.org/cancer/ntccpCA101.htm

Native CIRCLE

(Cancer Information Resource Center & Learning Exchange)

General Information

The Native CIRCLE is a resource center providing cancer-related materials to healthcare professionals and lay people involved in the education, care and treatment of American Indians and Alaska Natives.

The American Indian/Alaska Native Cancer Information Resource Center and Learning Exchange (Native CIRCLE) exists to stimulate, develop, maintain and disseminate culturally appropriate cancer information materials for American Indian/Alaska Native educators, healthcare leaders and students.

Resources Available

The Native CIRCLE does not produce their own materials. The materials listed in their resource catalog have been gathered from outside agencies, hospitals, clinics, etc., from within the United States and Canada. All materials are free of charge and there are no shipping and handling charges. There is a limit of 15 items with 50 copies maximum (items include videos which have a limit of two copies per video). Please allow 14-20 days for order processing.

How to Obtain Resources

Call toll-free 1-877-372-1617 for the *Resource Catalog* and/or use the order form included in the back pocket of this resource guide.

Native WEB

(Women Enjoying the Benefit)

General Information

Our program provides on-site training to nurses for the early detection of breast and cervix cancer.

Mission Statement

The Native WEB seeks to eliminate unnecessary breast and cervix cancer deaths among underserved women.

Our Vision

We exist so that in the near future all women will have access to appropriate breast and cervix cancer screening services, and at least 80 percent* of women will participate in programs of regular screening.

Resources Available

Native WEB brings Mayo trainers into the tribal and Indian Health Service Clinics to train community health aides in cancer prevention and support education, and to train nurses to provide breast and cervix cancer screening. Mayo Clinic also partners with the Indian Health Service and the American Indian/Alaska Native Community Networks Program to conduct cancer related outreach activities.

How to Obtain Resources

Call 507-284-4575 to schedule a training today.

Native American Cancer Research

General Information

Native American Cancer Research (NACR) is an American Indian operated, community-based 501(c)(3) (non-profit) organization. The mission is to reduce cancer incidence and increase survival among American Indians and Alaska Natives. Our priority is to implement cancer research projects involving: prevention, health screening, education, training, control, treatment options, and support.

Research Principles

Because our research is community-based, there are specific stipulations we follow:

1. The community must directly benefit (service or education intervention) from participating in the research project.
2. The research project needs to address the communities' health priorities in a culturally respectful manner while fulfilling the funding agency(ies) research requirements.
3. Members of the community "research team" must be included in leadership roles throughout the research project.

Resources Available

Curricula that have completed extensive intertribal testing for cultural and scientific appropriateness are available on our website as free downloads. These slides will still need tribal and geographic modifications to be culturally relevant to your local communities. We ask that you acknowledge NACR when you use our slides, but you do not need separate permission. Examples of online curricula are:

1. "Get on the Path to Breast Health"
2. "Get on the Path to Cervix Health"
3. "Get on the Path to Colon Health"
4. "Get on the Path to Lung Health"
5. "Get on the Path to Prostate Health"
6. "Clinical Trials Education for Native Americans"
7. "Native American Palliative Care"
8. "Native American Cancer Education for Survivors" (NACES) (the little tree on the left-hand side of the web page links to multiple information and resources for survivors)

Toll-free hotline. NACR staff provide support over a toll the phone to anyone in the US (1-800-537-8295) Monday through Friday 9-2:00 pm MOUNTAIN Time Zone.

Listing continued on next page

Native American Cancer Research

(Continued)

Trainings are implemented by NACR staff in Pine, CO; Denver, CO; in tribal communities' local organizational settings; and in conjunction with ongoing meetings. Training topics include, but are not limited to:

1. Starting and Maintaining a Local Native Cancer Survivors' Circle
2. Creating Cancer Early Detection Through Treatment Native Community Navigator Programs
3. Creating Effective Native American Cancer Outreach Materials and Strategies
4. Family Members Providing Chronic or End-Of-Life Care to a Cancer Patient
5. Developing Comprehensive Cancer Plans
6. Translating Clinical Trials Information For Community Members
7. Improving Provider Communication with Native Cancer Patients and their Family Members
8. Improving Researchers' Skills to Implement Culturally Respectful Community-Based Participatory Research
9. Creating the Next Generation of Native American Cancer Researchers

Community Education Workshops are implemented by three NACR staff usually in the local Native community setting. An average of 18 native community workshops are implemented and evaluated each year. Topics are tailored for the community and evaluation is typically carried out by the use of an electronic audience response system. Topics include, but are not limited to:

1. Easy-to-understand variation or excerpts of the topics listed above under "training" and "curricula"
2. Genetic Education for Native Americans

Public Speaking engagements are primarily implemented by three NACR staff and address a diverse range of topics.

Survivors' Conferences are coordinated in partnership with Native Peoples' Circle of Hope. These conferences are intended for Native American cancer survivors and their loved ones.

Publication and Grant Technical Assistance is provided by two NACR staff on topics as requested by the Native organization.

How to Obtain Resources

You may first review the materials on the website. When presentations, workshops or trainings are desired, please contact us at the business line below.

Community and National Programs

General Information The Lance Armstrong Foundation (LAF) inspires and empowers people affected by cancer. We help people with cancer focus on living; we believe that unity is strength, knowledge is power and attitude is everything. From the moment of diagnosis, the LAF provides the practical information and tools that people with cancer need to live life on their own terms. The LAF serves its mission through advocacy, public health and research. Founded in 1997 by cancer survivor and champion cyclist Lance Armstrong, the LAF is located in Austin, Texas.

Resources Available The **LAF Community Program** provides financial support and capacity-building counsel for community-centered initiatives that address the physical, emotional, and practical challenges of cancer. Through its Community Program, the LAF awards planning, implementation and evolution grants to community non-profit organizations to serve the needs of people living with cancer as identified by the *National Action Plan for Cancer Survivorship: Advancing Public Health Strategies*.

Also to help meet the needs of people affected by cancer, the **LAF National Partnerships Program** offers a coordinated, comprehensive approach that is aligned with the priorities established in the *National Action Plan for Cancer Survivorship: Advancing Public Health Strategies*. The LAF National Partnerships Program increases the visibility of cancer survivorship issues and enhances the public health infrastructure surrounding survivorship. The LAF identifies, evaluates, and forms long-term cooperative agreements with partner organizations, which leverage the strengths and resources of both organizations. Together, the organizations address the physical, emotional, and practical challenges of cancer.

Susan G. Komen Breast Cancer Foundation

- Mission** The mission of the Susan G. Komen Breast Cancer Foundation is to eradicate breast cancer as a life threatening disease by advancing research, education, screening and treatment.
- Power of a Promise** The Komen Foundation was founded on a promise between two sisters. Over 20 years ago, Nancy Brinker promised her dying sister, Susan Komen, that she would do everything possible to end breast cancer.
- Affiliates** The national headquarters for the Susan G. Komen Breast Cancer Foundation is located in Dallas, Texas. They have authorized 119 Affiliates worldwide to carry on the work of the foundation in local communities and states. The international affiliates are located in Germany, Italy and Puerto Rico.
- Resources** The national Komen Foundation and local Affiliates offer a wealth of breast health information, educational materials, grants and website resources. On the national website at www.komen.org you can find:
- An Interactive Breast Health video
 - Breast health and breast cancer information in English and Spanish
 - Co-survivor information
 - Latest updates on research grants
 - Local Affiliate locator program
 - National and local events
- Programs and Grants** Each local Affiliate listed below offers breast health information, referrals to local resources and grants to local organizations that meet the Affiliate criteria. Most Affiliates have both a Community Grant program (large grants) and a Small Grant program that are offered on specific dates during the year. These grants can be used for a variety of breast health and breast cancer programs, such as Education and Outreach, Treatment Support and Survivor Support. Please check each Affiliate website for grant application details.
- How to Obtain Resources** For more information on grants, please check the websites listed below for the local Komen Affiliates. Full Affiliate contact information is listed on pages 95 and 96 of this guide.

General Information

The mission of the American Lung Association® is to prevent lung disease and promote lung health through research, education, community service and advocacy. The American Lung Association celebrates 100 years. Founded in 1904 as part of the first nationwide corps of volunteers organized to combat a single disease: tuberculosis.

Resources Available

Today, 35 million Americans live with lung disease. Twelve million people have been diagnosed with chronic obstructive lung disease, and another 10-12 million have undiagnosed disease. Asthma is the leading chronic disease among American children. Half the nation's population still lives with polluted air. And 440,000 die annually from diseases directly related to cigarette smoking. To provide services and resources for those living with lung disease, we offer:

- Support Groups for those living with Lung Disease
- Web-site
- Literature Information & Call Center
- Professional Learning Workshops
- Asthma Management & Education Programs
- Asthma Camps
- Youth Tobacco Prevention Programs
- Adult Smoking Cessation Programs

How to Obtain Resources

If you would like more information and/or assistance with the services listed above:

- Call the Information Resource Center: 800-LUNG-USA
- Visit the following websites:
 - * Washington: www.alaw.org
 - * Oregon: www.lungoregon.org
 - * Idaho: www.lungidaho.org

Appendix B: Making Resources Available in Indian Communities

By Deb Schiro, Vice-President, Survivorship and Quality of Life
Great West Division, American Cancer Society

Most people have heard of the American Cancer Society (ACS), but beyond a vague notion of “research” and “fundraising” many people don’t know what the American Cancer Society does, and how they go about doing it. It is true that the ACS funds over \$100 million in cancer research every year. And it is true that the ACS does do fundraising to support this and its many other programs.

Almost all of the paid staff for the American Cancer Society are *community organizers* and *volunteer managers*. **What does this mean, and how can tribal communities work with ACS for the benefit of their community?**

Unlike government agencies that hire individuals to work with one or a few communities, the American Cancer Society hires a few paid staff to work with many different communities. The ACS staff work with the members of the community to organize programs and activities that will benefit the community. Then, the members of the community, in a volunteer capacity, carry out the work.

This staff model has been highly effective all over America, and allows the ACS to pay just a few people, while getting tremendous amounts of work done to help fight the menace of cancer in their communities. For example, let’s say a community has cancer patients who must get to and from radiation or chemotherapy treatments daily for several weeks, however some of the patients have no transportation to treatment. The ACS staff person assigned to that community can help organize a volunteer effort, so that volunteer drivers can take turns helping people get to their cancer treatments.

But, you might ask, why does our community need the ACS to help organize volunteer drivers? There are several ways in which the ACS can contribute to efforts such as this:

- The ACS staff person will be well trained to create and organize a group of volunteer drivers, and can assist in making sure all of the necessary components are in place. Some of these components are: (1) how to get the word out to the community that drivers are needed, (2) how to coordinate a schedule that covers several weeks of driving for the patient, (3) how to get the word out to the patients that might need help, that there are drivers available, (4) how to use the driver’s contact with the patient to introduce the patient to other ACS or community services for cancer patients.
- The ACS can conduct training for the volunteer drivers. You might wonder what the training would consist of, since the drivers already know how to drive! The training consists of additional information people need to know about cancer patients, such as feeling comfortable about talking with the patient about his or her illness (if the patient wants to talk) and answering questions potential volunteer drivers might have about transporting patients.

- The ACS carries a \$1,000,000 insurance policy that covers official ACS volunteer drivers while the volunteers are driving the patients. (All ACS volunteer drivers must carry their own insurance policy as well.)
- The ACS maintains a 24-hour a day, seven days a week, National Cancer Information Center, which can be called at 1-800-227-2345. Patients or caregivers can call that number anytime, night or day, to talk to a “live” person about starting the process of getting help from volunteer drivers. Other helpful information is available to the patient at the National Cancer Information Center as well.

This is one example of how tribal community volunteers can work in partnership with the American Cancer Society for the benefit of the community. Other programs available at ACS are: public education for early detection of cancer; Look Good...Feel Better, which utilizes licensed cosmetologists in the community to help women with wigs, turbans, and make-up to alleviate the negative cosmetic side effects of cancer treatment; legislative advocacy for state and federal legislation affecting the health of tribal communities, and tribal-based SpeakOUT! activities, which involve youth education to their peers on tobacco abuse.

The American Cancer Society is a volunteer organization, and your ACS staff person is eager to help your community volunteers develop tribal community activities and programs in the fight against cancer! To find out who your American Cancer Society staff person is, call 1-800-227-2345.

Appendix C: Screening Guidelines

Women

Breast

Women age 40 and older should have an annual mammogram, an annual clinical breast exam (CBE) performed by a health care professional, and a monthly breast-self examination. The CBE should be done close to, and preferably before, the scheduled mammogram.

Women ages 20-39 should have a clinical breast exam performed by a health care professional every three years and monthly breast self-examination.

Cervix

All women who are or have been sexually active or who are 18 or older should have an annual Pap test and pelvic examination. After three or more consecutive satisfactory examinations with normal findings, the Pap test may be performed less frequently. Discuss the matter with your health care professional.

Endometrium

Beginning at age 35, women with or at high-risk for hereditary non-polyposis colon cancer should be offered endometrial biopsy annually.

Men

Prostate

Men should consult with each health care providers to obtain information about the benefits and limitations of tests so they can make an informed decisions.

Health care providers should offer the prostate-specific antigen (PSA) blood test and digital rectal exam (DRE) starting at age 50.

Men at high risk (African-American men and men who have a first degree relative who was diagnosed with prostate cancer at a young age) should begin testing at age 45.

Men and Women

Colon and Rectum

Men and women who are at average risk for colon rectal cancer and who are ages 50 or older should follow one of the five examinations schedules below:

1. Fecal occult blood test (FOBT) every year, or
2. Flexible sigmoidoscopy every five years, or
3. FOBT every year and flexible sigmoidoscopy every five years (Of these three options, the American Cancer Society prefers option 3, annual FOBT and flexible sigmoidoscopy every five years.)
4. Double-contrast barium enema every five years, or
5. Colonoscopy every 10 years.

People with a history of polyps, colorectal cancer, or inflammatory bowel disease, or a family history of colon cancer or polyps are at higher risk for colon cancer and may need to start being tested before age 50, and have tests done more often.

These guidelines are for the early detection of cancer for people without symptoms. Some people are at higher risk for certain cancers and may need to have tests more often and start when they are younger. Talk with your health care professional to find out how these guidelines relate to you.

Cancer-Related Checkups

The American Cancer Society recommends having a cancer-related checkup every three years for adults under the age of 40, and every year for those over the age of 40. The cancer-related checkup should include examinations for cancers of the thyroid, mouth, skin, and lymph nodes, an examination of the testicles for men, and an examination of the ovaries for women. The checkup should also include health counseling (such as tips on quitting smoking).
