

Ted R. Lilley Cancer CURE Program

Interested in studying science research in college?

Want to gain hands-on experience in research?

The Ted R. Lilley Cancer Continuing Umbrella of Research Education (CURE) Program is a paid research internship that matches students with a cancer-specific researcher over the summer. Gain real world research experience that and create contacts that will help you navigate the medical research field. Interns will work full-time for at least nine weeks in a research laboratory alongside OHSU scientists conducting cancer research.

CURE Program Offerings

- Paid internship in a research lab with a Knight Institute mentor
- Weekly curriculum in math, statistics, essay writing, and more
- Seminars featuring experts from various oncology disciplines
- A poster presentation of your research project

Who Should Apply

- Current sophomores and juniors from Oregon high schools, particularly public school students in the Portland Metro area
- Students from historically underrepresented or socially and economically disadvantaged backgrounds
- Must be 16 or older by June 13, 2014
- All students must also have a 3.5 G.P.A. or higher, and have taken at least one science class, preferably biology and have an interest in research

Applications will be available in December 2013.
