

SAMHSA works with federal partners, states, and community stakeholders to develop and coordinate a comprehensive response to the opioid epidemic. SAMHSA addresses opioid use and misuse through approaches such as informing and guiding opioid prescribing practices, the expansion of medication-assisted treatment (MAT), and individual-provider decision making tools.

INDIVIDUAL AND COMMUNITY RESOURCES

Decisions in Recovery: Treatment for Opioid Use Disorder

SAMHSA supports the widespread adoption of recovery-oriented services, and systems for people in recovery from substance use and/or mental disorders. Decisions in Recovery: Treatment for Opioid Use Disorder, SAMHSA's new shared-decision making tool under the Bringing Recovery Supports to Scale Technical Assistance

Center Strategy (BRSS TACS), allows individuals, together with a healthcare provider, to learn about using MAT options to strengthen their recovery.

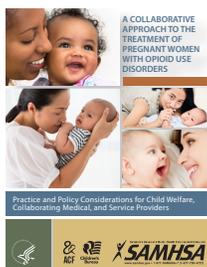

Features include easy to understand information, tools to assist the person in recovery, videos of recovery stories, downloadable worksheets to assist individuals in making decisions about treatment options with a provider and a handbook that reflects information from the Decisions in Recovery tool. Visit Decisions in Recovery at bit.ly/DecisionsInRecovery

Opioid Overdose Prevention Toolkit

This publication equips health care providers, individuals, communities, and local governments on ways to prevent and respond to opioid overdose. It addresses issues for first responders, treatment providers, and those recovering from opioid overdose. Learn more at: store.samhsa.gov/product/Opioid-Overdose-Prevention-Toolkit-Updated-2016/SMA16-4742

A Collaborative Approach to the Treatment of Pregnant Women with Opioid Use Disorders

This manual offers best practices to states, tribes, and local communities on collaborative treatment approaches for pregnant women living with opioid use disorders, and the risks and benefits associated with MAT. Download your free copy at <https://store.samhsa.gov/product/A-Collaborative-Approach-to-the-Treatment-of-Pregnant-Women-with-Opioid-Use-Disorders/SMA16-4978>

FIND HELP

These resources can be used to find specialty treatment for substance use disorders in your community.

Find alcohol and drug abuse treatment or mental health treatment facilities and programs.
findtreatment.samhsa.gov

Find physicians authorized to treat opioid dependency.
samhsa.gov/medication-assisted-treatment/physician-program-data/treatment-physician-locator

Find treatment programs in your state for addiction and dependence on opioids.
dpt2.samhsa.gov/treatment

Get treatment referrals and other information at this free, confidential helpline, available 24/7, 365 days a year
 1-800-662-HELP (4357)

PRACTITIONER RESOURCES

SAMHSA resources help practitioners be better prepared to identify a need for, and connect patients to, appropriate opioid use disorder treatment.

Screening, Brief Intervention, and Referral to Treatment (SBIRT)

An approach to early intervention and treatment to people with substance use disorders and those at risk of developing these disorders. samhsa.gov/sbirt

SAMHSA has also produced a Technical Assistance Publication on SBIRT which includes more detail about developing processes to refer people to substance use disorder treatment: store.samhsa.gov/product/TAP-33-Systems-Level-Implementation-of-Screening-Brief-Intervention-and-Referral-to-Treatment-SBIRT-/SMA13-4741. Additional information about SBIRT can be found at the SAMHSA/HRSA Center for Integrated Health Solutions: integration.samhsa.gov/clinical-practice/SBIRT

Medication-Assisted Treatment Courses

SAMHSA provides continuing medical education (CME) courses on prescribing opioids for chronic pain and MAT. Most of the courses also include resources that address practice management, legal and regulatory issues, opioid pharmacology,

and strategies for managing challenging patient situations. Learn more at: samhsa.gov/medication-assisted-treatment/training-resources/opioid-courses

Providers' Clinical Support System (PCSS)

PCSS is a national training and mentoring project developed in response to the national increase in opioid use disorders. This includes a number of resources that physicians can use to get Continuing Medical Education/Continuing Education related to proper opioid prescribing and providing MAT. Learn more at: pcss-o.org for effective use of opioids for treatment of chronic pain and safe and effective treatment of opioid use disorder, and pcssmat.org for MAT.

Pocket Guide

Offers guidelines for physicians using MAT for patients with opioid use disorder. Discusses the various types of approved medications, screening and assessment tools, and best practices for patient care. Download your copy today: bit.ly/MATforOpioids

MATx Mobile App

MATx empowers health care practitioners to provide effective, evidence-based care for opioid use disorders. MATx includes a step-by-step guide for practitioners to become certified to prescribe buprenorphine, information on medications for opioid use disorders, including buprenorphine, methadone, naltrexone, and naloxone for opioid overdose prevention, clinical support tools, such as treatment guidelines, and ICD-10 coding, and access to critical helplines and SAMHSA's treatment locators.
