

SAVE THE DATE!

IHS National HIV Testing Initiatives Workshop

Workshop Objectives:

1. To develop promising practices through discussion on HIV testing implementation successes and barriers.
2. To provide an update on multiple HIV initiatives and the tools and resources that will assist implementation strategies and policies.
3. To expand and refine our I/T/U HIV infrastructure to improve the quality of and access to HIV services in our system

Intended Audience:

I/T/U health providers, community health workers or HIV testing project managers, and others who provide HIV/AIDS-related services to American Indians and Alaska Natives.

Workshop Highlights:

IHS national, regional and local project leads, external experts, community experts and interagency speakers on topics such as implementing HIV screening, stigma, success stories and barriers, and related clinical co-risk factors (STI, Hepatitis C, etc.).

June 2-3, 2010
Chaparral Suites Hotel

Scottsdale, Arizona
Hosted by: IHS National HIV/AIDS Program

The Indian Health Service (IHS) National HIV Testing Initiative Workshop is hosted by the IHS National HIV/AIDS program. This workshop includes IHS, Tribal, and Urban sites implementing expanded HIV screening for American Indians / Alaska Natives across the U.S.

Workshop Objectives:

1. To develop promising practices through discussion on HIV Testing implementation successes and barriers.
2. To provide an update on multiple HIV initiatives and the tools and resources that will assist implementation strategies and policies.
3. To expand and refine our I/T/U HIV infrastructure to improve the quality of and access to HIV services in our system

For planning purposes, it would be much appreciated if you could RSVP as soon as possible. Please respond to Juanita.lee@ihs.gov with a CC to Brigg.reilley@ihs.gov as to who will attend from your service unit (SU), urban site or Tribal project.
