

Facilitated Discussion

Ashley Hoover

Communicable Disease Epidemiologist

Nancy Bennett

Washington Tribal Public Health Improvement Manager

Tribal Data Priorities & Needs

- How will the data and resources presented today be useful for your work?
- Do you have any examples of data collection or use at your tribe?
- What COVID-19 surveillance data needs do you have, if any?

Tribal Data Priorities & Needs

- Poll: Which currently available data reports are you most interested in or have found useful?
- Do you have any requests for future data linkages or reports, either in communicable disease or other areas?

Next Steps

Nancy Bennett

Washington Tribal Public Health Improvement Manager

Communicable Disease Resources Survey

- Survey of Washington tribes to document resources and strengths to support understanding of local impact and control of communicable disease
 - Expected to launch March 2021, after completion of AIHC regional focus group sessions
 - Tribal staff expertise and experience
 - IT resources for data collection and reporting
 - Relationships and collaborations
 - Best practices in tribal communicable disease
 - Gaps, challenges, and needs

WA Tribal Public Health Improvement Community of Practice

- Washington-specific discussion group for public health improvement and exploration of foundational public health services topics
- Training and resources
- Sharing best practices and needs
- Opportunities for joint sessions with Oregon and Idaho tribes for regional collaboration and exchange
