

How to force a new drug entry onto the "All Other Meds" list in EHR.

(This requires @ Fileman access, so may require a Site Manager or CAC depending on your access level)

Use FileMan to inquire to ORDER QUICK VIEW file and look at the entry for ORWDESET O RX (replace with ORWDESET IVM RX, ORWDESET NV RX, or ORWDESET UD RX if needed for IV, Non-VA, or Unit Dose) and hit Enter to scroll through until you see that it has been added correctly. Of course, the lower in the alphabet means staring at a lot of screens on the way.

Select VA FileMan <TEST ACCOUNT> Option: INquire to File Entries
