Washington

June 9, 2020

COVID-19 by Date of Onset

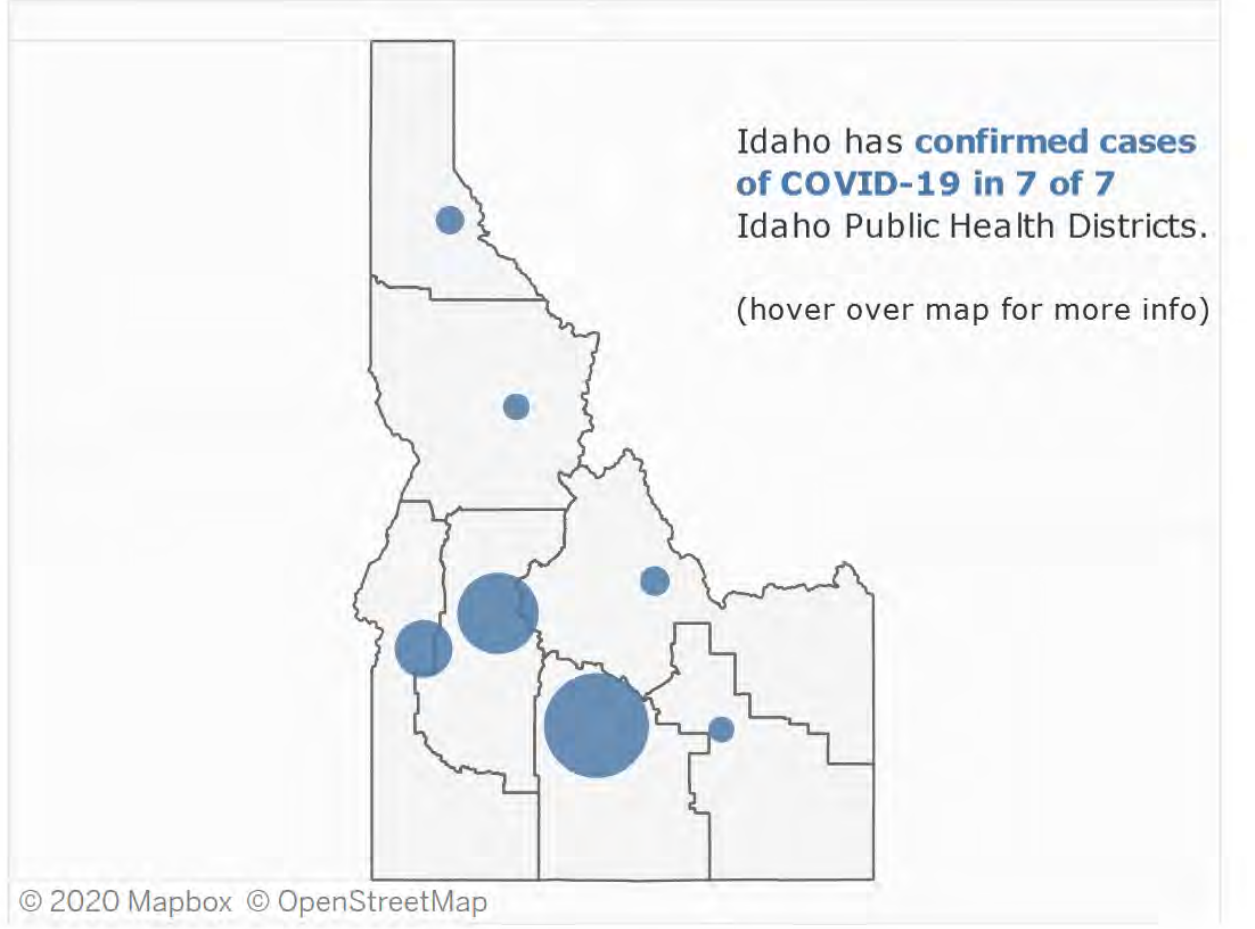

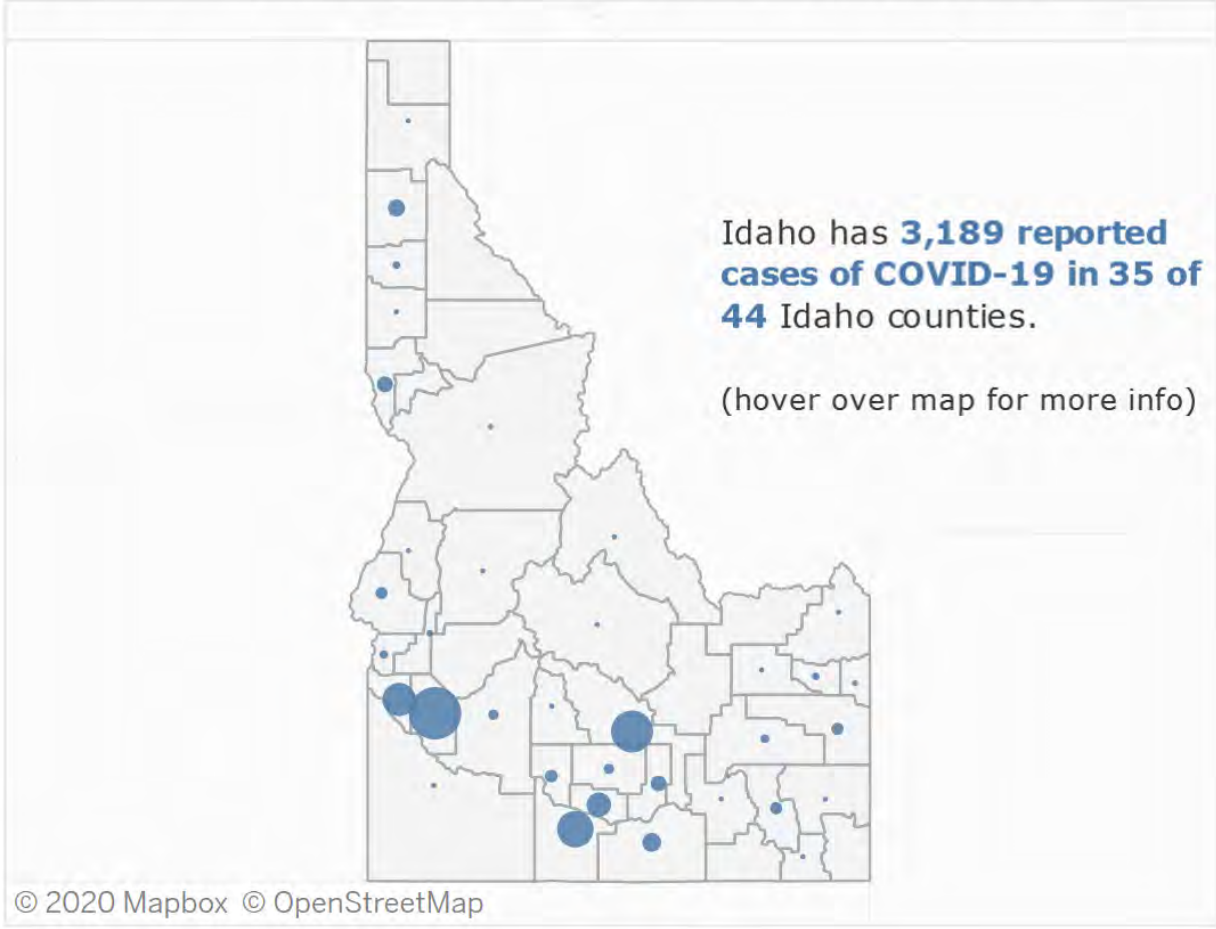

In an effort to more closely align with testing schedules at all the labs and work flow at the local public health districts, the Department of Health and Welfare will update data at coronavirus.idaho.gov at 5 p.m. Monday through Saturday. The data update schedule will be reassessed if the course of the outbreak changes. **Data are preliminary and subject to change.** Idaho case counts include both probable and confirmed cases based on an interim [COVID-19 position statement](#) issued by the Council of State and Territorial Epidemiologists on April 5, 2020.

Oregon's Epi Curve: COVID-19 cases

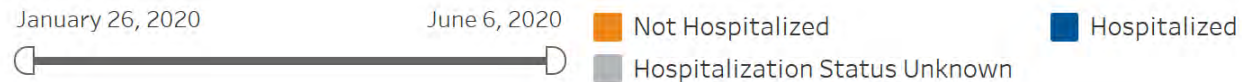

This chart shows the number of Oregonians who have been identified as COVID-19 cases and whether they were ever hospitalized for their illness. ‡

| Total Cases | Hospitalized | Not Hospitalized | Hospitalization Status Unknown |
|-------------|--------------|------------------|--------------------------------|
| 4,922 | 843 | 3,733 | 346 |

*Illnesses that began during this time period may not yet be reported.

When people say we want to “flatten the curve,” this is the curve they are talking about.

We want to slow the number of new cases of COVID-19 so our healthcare system isn't overwhelmed and can provide care to everyone who needs it. Staying home except for essential needs and practicing social distancing are important ways we can flatten the curve.

Testing and Outcomes by County

Oregon's COVID-19 Testing and Outcomes by County

This map shows the number of COVID-19 cases per 10,000 people by county in Oregon.* The rates help us compare counties of different sizes more evenly. Below to see the total number of cases, recovered cases, deaths, and positive and negative rates and percentages for all counties.
