

TPHEP PRE-CONFERENCE TRAINING

Mass Fatality & Reunification Workshop

Join us at the Mass Fatality Workshop! This workshop will serve the governmental public health system, including Tribal health jurisdictions, local health jurisdictions, state agencies, healthcare partners, and emergency management partners. The training will provide participants with a clear understanding of legal authorities, operational roles, and coordination responsibilities across agencies during a mass fatality incident. Core components of the workshop will include presentations on mass fatality management, reunification operations, family assistance center operations, and the integration of cultural and tribal considerations.

This course will prepare participants to:

- Establish key mass fatality management functions, including reunification and Family Assistance Center operations.
- Gain a better understanding of how public health, Tribal, local, state, and emergency management partners work together in a mass fatality response.
- Apply effective communication and coordination practices to support a respectful and organized response.
